REST API

Jenkins 2.568.2

The screenshot displays the Jenkins web interface in a browser window. The address bar shows 'localhost:8080/job/job2/1/console'. The Jenkins logo and job name 'job2' are visible in the top left. A sidebar on the left contains links for 'Status', 'Changes', 'Console Output' (which is selected), 'Delete build '#1'', and 'Edit build information'. The main area is titled 'Console' and shows the build's output. The output text is as follows:

```
Started by user asyush
Running as SYSTEM
Building in workspace C:\ProgramData\Jenkins\jenkins\workspace\job2
[job2] $ cmd /c call C:\WINDOWS\TEMP\jenkins15499604685765891562.bat

C:\ProgramData\Jenkins\jenkins\workspace\job2>echo hello jenkins
hello jenkins

C:\ProgramData\Jenkins\jenkins\workspace\job2>exit 0
Finished: SUCCESS
```

Buttons for 'Download', 'Copy', and 'View as plain text' are located above the console output. The version 'Jenkins 2.568.2' is noted in the bottom right corner.

Result: Successfully installed Jenkins on Windows, completed the initial configuration, installed plugins, created an administrator account, and executed a sample Jenkins build successfully. Conclusion: Jenkins was successfully installed and configured on Windows. The Jenkins dashboard was explored, plugins were installed, and a sample build job was executed successfully, demonstrating the foundation of CI/CD automation in DevOps.
